When you visit the CPO Sites to place an order, browse, read, or download information, we may automatically collect and store the following types of nonpersonally identifiable information. You can use portions of the CPO Sites without providing any Personal Information. However, in order to take advantage of the full capabilities of the CPO Sites and to obtain access to, and use of, many of the features found on the CPO Sites, including placing orders for products offered for sale on the CPO Sites and receiving CPO email exclusives, you must provide certain Personal Information. You may also provide Personal Information when you participate in various services and offerings on the CPO Sites. Personal Information may include, without limitation, your name, address, phone number, fax number, email address, and other similar information. Information collected automatically through the CPO Sites provides us with information regarding your use of the CPO Sites, including which pages are the most popular with CPO Sites users. That information also allows us to determine if the CPO Sites are working properly and to make changes to the CPO Sites to allow the user to have a better experience on the CPO Sites. We do not use that information to identify a particular user. By remaining opted in to our email list, you are acknowledging that we may sell, rent, share, trade or otherwise provide or transfer your nonpersonally identifiable information such as demographic and occupational information to third parties. Such third parties may use such information for whatever purposes they wish or may transfer such information to other third parties.

We may also exchange information, including Personal Information, with other companies and organizations for credit fraud protection and risk reduction. We may also share your Personal Information with certain third parties that perform services for CPO. Those third parties may host the CPO Sites, operate certain features on the CPO Sites, print or send mailings, provide marketing materials for the CPO Sites, authorize and process your payments, provide customer service, analyze data and assist in fulfilling your orders, send emails on CPO's behalf, or otherwise assist CPO with the operation of the CPO Sites. Those third parties are not authorized to use or disclose your Personal Information for any purpose other than to perform the services designated by CPO. We may participate in cooperative database services. These services help us to direct print mailings and other marketing initiatives to appropriate purchasers and website visitors. Names and mailing addresses may be shared between participating parties in the cooperative database services, but no credit card information or email addresses are provided to the cooperative. CPO may also provide your Personal Information to a third party if CPO in good faith believes that access, use, preservation or disclosure is reasonably necessary to satisfy any applicable law, regulation, legal process or enforceable government request. For example, CPO may be required to disclose your Personal Information to respond to a subpoena, court order or other legal process. By using the CPO Sites, you consent to those transfers and to the processing by CPO of that information. CPO does not sell products that are intended for children and does not intend to collect Personal Information from individuals under the age of eighteen 18. If you are the parent or guardian of a child who has provided personal information to us, please inform us as provided under Section 12 below, and we will delete that Personal Information.

You may find out more details regarding this privacy policy by contacting us see Section 12. As we may make changes to this privacy policy at any time without notifying you, we suggest that you review this privacy policy each time you access or use the CPO Sites. Please note that our rights to use your Personal Information will be based on the privacy policy in effect at the time the information is collected. This efficient and effective unit is light, at only 2.6 Lbs., and compact, at 11.0 In. long. But it delivers a 0.57 In. stroke that can get cuts accomplished, and in small work areas. The kit comes with a 12V Max battery and a 12V Max charger, for longrunning power. Its only 11 In. long and weighs only 2.6 Lbs., providing great balance and control. Users who often find themselves having to saw overhead will enjoy this tool. It includes an LED light to illuminate work spaces. The fast motor brake offers better user security and produces accurate cuts. What a great tool for so many tasks. Just had to have one for myself and received it as a birthday present. One of the best birthday presents ever. It came with everything I needed to get started; blades, battery, charger and an awesome tool bag. I was able to combine my other Bosch 12V drills and drivers in this one bag to keep all my tools and batteries together. Fits well with the rest of my 12v Bosh tools. They are light and powerful. I hardly have to break out the 18v stuff. This would certainly never replace a full sized reciprocating saw for my work needs as the blade travel is rather short.

<http://inspired2write4him.com/images/canon-powershot-s2-is-manual-portugues.pdf>

The tool is also not ideal for longer blades but again, it's a life saver in space confined conditions. Many of the reviewers have stated an issue with removing the battery but I've had no problems what so ever. It is small enough to get into tight spaces and gets the job done fast. I would buy it again. Works great! Light can use with one hand. Can use full size blades. I have alot of the little 12volts tools been a fan since the first PS 20 kit I got in 2006 and it still works great. I was looking for a saw I could handle. This is light weight which i appreciate as i am a 57 yr old female. Saws scare me a bit, and i dont have the strength to feel comfortable using the big boy stuff. I have used this for many things but really like it for cutting limbs on my acreage. My only suggestion would be to make the battery a bit easier to remove. I have weak hands. but other than that 5 stars! It performed excellent, I use this tool today at every job site Learn More Exclusions apply. This is a common question of healthcare professionals and pupils. While it is quite apparent to all that many

individuals suffer from painkillers or some other medicine they are taking, in addition, there are many patients who are not reacting well to their drug regimen. But in regards to specific cases where painkillers are ineffective or maybe completely useless, a particular tool known as a fishbone diagram is used. Since fishbone diagram isn't simply a basic drawing that is a 1 way map, it is imperative that the drawing be reviewed before it is used to make any conclusions. First of all, the physician and the individual should share some kind of consensus on what is important at a fishbone diagram. Then, after this is established, the health care provider will have the ability to view the fishbone diagram he's working on. It's also important to be aware that if a fishbone diagram is used in health care, the best thing to do is to not try to browse the fishbone itself.

Instead, start looking for just the ends of the bones. This will allow a more precise and more honest evaluation of the place of the pain. The medical world understands that one of the reasons that fishbone diagram is really helpful is because it can help to draw lines and areas of interest. This allows the doctor to know exactly where the pain is coming from and how serious the situation is. After all, if it was only pain, the pain will probably go away within a few days, but if it's actually debilitating, a doctor will need to have just a little bit longer to diagnose the problem. Another reason fishbone diagram is utilized in health care is because it helps to identify the weakness in the entire body that the individual may be suffering from. Even though painkillers may appear to provide immediate relief, the reality is that this may only offer temporary relief. So, a fishbone diagram can be useful to be aware of the area of the pain and providing some longterm alternatives as well. So, what's fishbone diagram utilized for in health care. It's something that is relatively simple and straightforward to use, yet also extremely effective. Knowing this is beneficial since a patient is not going to have to guess in a fishbone diagram and also will be able to do it fairly fast. I think I may have been expecting too much of this product. I was hoping it would be something I could take camping to help process firewood. It frankly has a really hard time getting through wood quickly, even with a dedicated wood cutting carbide tipped blade. Even with the nail embedded wood carbide blade less aggressive, but still designed for wood it's slow. It does a lot of catching in the wood and just shaking the wood back and forth instead of cutting it. Turns out a silky folding saw is faster, lighter, only takes moderately more physical effort, and is just more pleasant to use. So I would not recommend this for camping or pruning.

[www.elsecretodelolivo.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c50dc b1444---carlsbro-amps-manual.pdf](http://www.elsecretodelolivo.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c50dc b1444---carlsbro-amps-manual.pdf)

That all being said, it makes a pretty good hacksaw substitute when used with a metal cutting blade. I prefer it to using the hacksaw faster & less effort, less blade binding or angle grinder safer in a bunch of different ways and less setup. It's not gonna do it as fast or for as large a piece of metal as a corded or 18v full sized model, but it does a lot better in metal than in wood and is a lot easier to control with the smaller teeth. It's also a high quality and well built tool. Verisign. Clutte red or dark ar eas inv ite acc iden ts. electric shock. When operating a power tool outdoors, use an extension cord suitable for outdoor use.

Use of a cord suitable for outdoor use reduces the risk of electric shock. If operating a power tool in a damp location is unavoidable, use a Ground Fault Circuit Interrupter (GFCI) protected supply. Use of an GFCI reduces the risk of electric shock. Personal safety Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury. Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries. Prevent unintentional starting. Carrying power tools with your finger on the switch or energizing power tools that have the switch on invite accidents. Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury. Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations. Dress properly. Do not wear loose clothing or jewelry. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewelry or long hair can be caught in moving parts. If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust related hazards.

Power tool use and care Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed. Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired. Faça sua pergunta aqui. The super efficient and powerful 1.5Ah high capacity battery and a powerful 3,000 SPM motor provides ample power to increased productivity and enhanced power.

Change the blades with ease and experience added durability and sturdiness with the Bosch 12Volt Max Pocket Reciprocating Saw Kit PS60102. Ideal for cutting, trimming, carving and other applications, this hand tool by Bosch is ideal completing small projects around the house. Fast Cutting Significantly faster than a hand saw, as fast or faster than our competition. Compact Small enough to reach into tight areas and corners. Fuel Gauge Easier battery management for continued work. Comfortable SoftGrip Top and Body Multiple grip positions to prevent hand fatigue. Click here to

make a request to customer service. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Ron Ramsey 5.0 out of 5 stars I love this thing because, for me, it's something I can easily handle. I have a Milwaukee Saws All. This little guy is SO HANDY, but it does have its limitations. But actually, for tree branch cutting, the blade that comes with it cuts better. Faster doesn't really get the job done faster. A necessity of design dictates a pretty short stroke. Tree trimming one handed wasn't working very well because the branch just wiggled with the blade. This is where blade speed, angle, and pressure came into play. I found light pressure on a flexible branch worked faster. I've used this on wood, aluminum, PVC, steel, all clamped down, or in a vice, so the work can't jiggle. It's nothing like a SawsAll, but it beats doing it by hand. Battery doesn't last very long. If you have many cuts to make consider a spare battery, or lots of coffee breaks. I had some trouble at 1st, removing the battery for charging, but now that I've done it a few times, it's not a complaint.

I already owned the drill driver and impact driver and had been very happy with the easy ergonomics and tight access on those tools. There are a number of great things about this saw. 1. the carry case. It is a step up from the drill driver case which is not that practical. Zippered with a handle it now stores the saw, drill driver, impact driver, drill bits and charger. 2. battery carries enough charge to get all but the largest job done. Started on 3 bars and had reduced to 2 bars after cutting out door from T111 siding. 3. Power the sweet spot for using this is product that adds up to 1 inch thick. I have used it on siding, abs pipe, corrugated iron roofing material, trim planks etc. Would I use it to demolish 2x4 window framing that is nailed in you could, but that would take some time. Could they improve it. Funnily enough I found holding the tool reversed cutting away from myself gave a great deal of control. This meant the tool could be used to cut 1x3 trim boards more safely than with a skill or table saw. Would be easy enough to have this done at the factory. The included saws are fairly basic. Pick up some others. A 10 TPI wood blade would be useful. The oscillating tool will be my next Bosch 12V purchase. My second gripe is the agony in trying to get the model and serial numbers from all 3 items the saw, charger and battery Bosch says they're required to get the 3 year warranty. You also had to guess which numbers were the required ones since they're there, but not identified in any way. A further small, but unimportant, annoyance was that you could take your choice of French or Italian for the happily not required info on the battery, but not English. Bosch make a great product and then let this witless inattention to detail mar the experience and give a good deal of frustration when you feel all warm and cuddly towards Bosch because of the terrific saw. A shame.

You may need a bigger battery or a corded saw for more demanding jobs, but this saw suits my needs for an occasional job very well. The battery is fully compatible with my Bosch battery drills, another big plus. Actually I have 3 of them I like them that much. They are small and very versatile and lightweight. I ask them to take on jobs that should be too much for them. But they keep performing for years now. I take care of my tools, thus 3 of them. I will use one until the battery dies, then move on to the next one. That gives the tool a chance to cool off and not overheat them expecting them to run nonstop all day long. These are so handy. Highly recommend them! While it certainly cannot keep up with a corded or even 18v saw, it does get into tight spaces and is very easy to control. When the tip of the saw hits a hard surface and the unit kicks back, the force is not going to break your wrist. I have used this reciprocating saw with 6inch and 9inch blades, and it handles both very well. The battery discharges rather quickly when using it intensively, so have a spare on hand. I plan to get a 4.0Ah battery for use with mine. Sorry, we failed to record your vote. Please try again Has some gravity to it. Mine, the battery compartment has the locking parts a bit too large so when compressing the battery tabs to release the battery it is very difficult compared to other 12V style tools. Will update later after I take it through its paces. Sorry, we failed to record

your vote. Please try again Use also Bosch lithion Battery they last longer than the regular oneSorry, we failed to record your vote. Please try again Sorry, we failed to record your vote.
