Please try again shortly. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. Being refurbished, it is a little louder and clunkier than my old one; but this one works. Some gears came misaligned in my old printer, and it quit working. Havent had any real issues with this one. I had to be very careful in aligning the CD print tray. Once I got it right, it did print. It is also extremely noisy. That had me concerned, but its been working for a few weeks now. I dont print on it every day though. My first one functioned well for nearly 4 years with no problems until the very end. I think the Wifi card went kaput. This replacement was all I needed. However, it arrived in a cardboard box with no packing materials. Corners were missing and parts were sticking out. <http://go2cargo.com/userfiles/delphi-skyfi2-sa10101-manual.xml>

- **hp printer c309a manuals, hp c309a printer manual.**

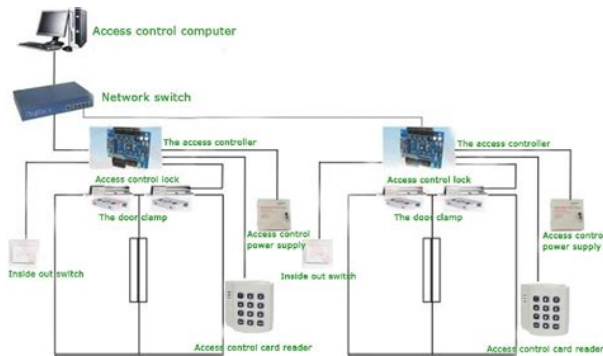

When I picked the box up off my porch I could hear loose parts rolling around inside like so many screws, nuts and ball bearings. I got deep scratches on my forearm from whatever was protruding from the box so I never opened the thing. The vendor was gracious to take it back and refund my purchase. He even sent me a postage paid return label so I didnt have to pay for shipping. Id buy from this vendor again because he treated me right. However I would be sure to specify that the product be shipped with the appropriate packing materials. Please try again later. Pyrophore 1.0 out of 5 stars At 10,000 copies, the feeder died. So I got a new one from Costco. Went against my intuition for an Officejet and got this one. Huge mistake. Its just over a year old. Never could get the WiFi to work. I am an advanced PC user too. A waste of investment in the hardware and so trying on my patience. Im giving it away for parts on FreeCycle, although my preference would be to take a sledgehammer to it petty, maybe; satisfying, absolutely. I wouldnt sell the POS; that would be unfair to someone else. I will likely NEVER buy HP again. Probably go with Canon. Please try again later. Please try again later. R. Lay 1.0 out of 5 stars Like almost everyone else with a one star review, this printer is the most temperamental piece of garbage I have ever owned. Of the four laptops I use, the only one it ever synchs with via wireless printing is an ancient Dell. My HP laptop constantly notes it as offline, and whether on wireless or Bluetooth, it drops the connection, goes offline, keeps jobs in the print queue, which requires a constant troubleshooting exercise to clear the spooler. It works even worse with my new MSI laptop, purchased in late 2011. If you use the printer for another function, say faxing, scanning to flash drive, or plugging it into a laptop via USB, it gets out of synch again with Bluetooth and wireless. <http://sns-russia.ru/userfiles/delphi-skyfi-xm-radio-manual.xml>

Worse, if you attach it to the USB for direct printing or scanning, it insists on installing old drivers every single time. HP has never issued any software fixes, indicating to me they simply don't care. The HP printer software, included with the printer features a control panel that hates Windows 7 and is of no use in troubleshooting these issues. As a writer for a local online news site, I find myself spending far more time trying to get the machine to print drafts than I do writing articles. I end up using my much older HP 8400, which works fine on Windows XP, 7 and Mac. Please try again later. Please try again later. John K. 1.0 out of 5 stars If you weren't printing something important out, and you didn't spend your hard earned money on this piece of junk, you'd take a bat to it immediately. I know I'm just some anonymous guy on the internet, but please spare yourself the extreme frustration that I and the other people in these reviews have had to endure. Please try again later. Please try again later. Alexander 1.0 out of 5 stars From the very start the circuits were not strong enough to light the scanner bulb. You start scanning from Acrobat, then the scanner tries to light up the bulb and it will take literally days. The only solution is to unplug the unit and plug it back. Then, magically, the scanning bulb will become operational. Of course, by that time your Acrobat crashes and the computer has to be restarted. Recently the gears providing the initial push of printing paper broke. The rollers do not turn at all. You can push the paper by hand and then this HP prints. You cannot do it for the photo tray though. The printer has printed 1000 pages total. The advice HP is providing for this case is a joke: check paper size, check drivers, clean rollers etc.. That's as giving advice if your car stalls: empty the ash tray, clean the windshield, wipe off the headlights. Going to trash bin. I would suggest moving to Canon. Please try again later. Please try again later.

Boston Cassidy 1.0 out of 5 stars After owning this printer for four years, I now have a printer that is more useful as a door stop, than a printer. The first three and a half years I owned the printer it ran fine, it used ink cartridges like there is no tomorrow, and would often forget its wireless settings, but I could live with that because it had good print quality. All of a sudden the black text would no longer print. The new printer head worked for less than a day. I am now back to black text printing not working. Until HP learns how to make a support a printer, spend your hard earned money on another brand. Please try again later. Please try again later. Stephen Ferris 1.0 out of 5 stars So many difficulties in scanning, printing and faxing. Scanning would take forever and a day to perform this function. When I do not use the printer goes into a deep sleep like Sleeping Beauty and never wakes up and forces me to physically unplug and replugin the adapter from this printer. My wife told me about Costco's ability to refill the ink in ink cartridges and I have to hand it to HP for when I did that. The printer absolutely refused to recognize the ink was full and could not be calibrated and probably the only way to fix the issue is to rebuy new ink cartridges. Worthless printer. I have had good HP products before my HP 855c ink jet printer worked like a charm. This printer I hope will last me for years and I only have to buy toners after about 2000 pages later! Please try again later. Please try again later. Book Lover 1.0 out of 5 stars For starters, out of the box the software was obsolete, necessitating an involved go-around with downloading software from the HP website and numerous trials getting it installed and having the thing actually do productive work. The wireless feature never did work right, even though the machine was less than 5 from my laptop!! finally just

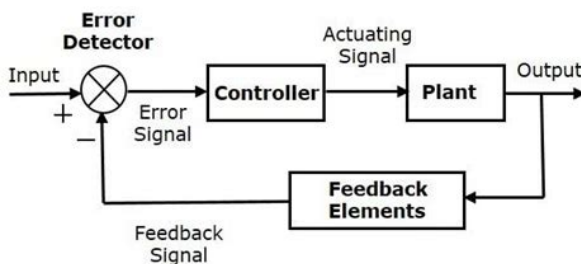

hardwired it.

<https://labroclub.ru/blog/3m-5xl-sterilizer-service-manual>

Then there was the endless shuttling back and forth to the local Staples and Office Depot stores to exchange bags of toosoon kaput cartridges for new ones. Come on guys, why do these cartridges cost so much Nice business model HP. The coup de grace came the other day; it stopped printing black in the middle of an important print job for my consulting business. Useless error messages. Wasted several cartridges. Had already been through all this with a friends HP 6500 of same vintage wherein a week was wasted going through hoops, not to mention some shouting matches and it still doesnt work. Like with all modern ADP equipment, its another thing, and another thing, and another thing.and it still doesnt work. Long story short the C309 goes in the recycle bin next Monday, but not before I work it over with my trusty 9pound hammer and let my springer spaniel wiz on the pieces. The unused cartidges go back to the store. A new Epson was delivered today I just hope it works better.Please try again later. Please try again later. Angela Hough 1.0 out of 5 stars The fax has continual problems after faxing documents through, the feeder attempts to pull other sheets of paper, even though there are no documents left in the feeder. Then, the fax performance worsened when every fax sent resulted in a fail message. The recipients received my faxes, but the printer always gives me the same error message. Approximately 60 days after the warranted coverage, the wireless card failed. After talking with HP technical support for one hour, asking about ANY options available, they told me to buy a new printer. Excuse me Nope, no replacement card available. So, I physically plugged the printer into our computers when we needed to print documents. HP isnt going to get my money again only 14 months after purchasing a brand new unit. Now, even the print function doesnt work on this machine. The paper simply will not pull into the printer correctly, so the roller alignment must be off.

<https://gruposolux.com/images/brandt-sprayer-operators-manual.pdf>

The ONLY function currently working is the scanner. for now. Save yourself many hours of frustration purchase a Brother or Epson, anything but HP.Please try again later. Please try again

later. Trakie1 1.0 out of 5 stars I am a home user, with occasional big jobs. Typically, the printer can sit unused for days, or maybe we print 24 sheets on a given day. Occasionally I print some brochures usually 50200 at a time, so I have used it for some larger jobs. I have had this printer just a little over a year. Received in January of 2010. This week, I received an error message about the print cartridge, and when I opened the printer boing. Out sprang a thin strip from within the machine. Oh, great. now this one! This is the THIRD I repeat THIRD machine I have had from HP. That was still in warranty, so they sent me a new one albeit a different model because my other wasnt available. OK, I can deal with that. Except, the replacement printer came with missing parts. They told me to take the parts off my old machine. Now, just out of warranty, this one has gone kaput. All the hours I have spent on the phone with tech support, wasted. Oh yeah did I fail to mention you will NOT get support from someone who speaks English as their primary language which is difficult enough, but you will spend HOURS on the phone. All the exchanges cost me 11 hours total. I have to scan to memory card, then take the memory card out of the machine, put it in my PC, copy the file over, etc. It is such a hassle. In general, I have never been impressed with HP printer drivers. Oh, and dont forget the cost of the ink. This printers slurps it down like a teenage boy drinks milk. If the features worked, it would be great. The LCD screen is easy to navigate. And lets not forget that the print quality is very good. Excellent photos. But this just isnt enough to redeem it. In the end, I recommend finding a more reliable company to purchase from.

<http://arteratech.com/images/brandt-vh600j-manual.pdf>

Lexmark Brother Obviously, HPs lack of quality machines arent worth paying for. You do NOT want to live my experience! Please try again later. Please try again later. Steve 2.0 out of 5 stars These days, theyre not what they were. The software install is over 200 MB just checked Samsungs web page, 23 MB. Under Linux its generally easy just works, but under Windows its bloaty. The document feeder doesnt work well you have to hold on to pages one at a time so that only the top one can be pulled in, otherwise itll pull in more than one. I have a brother printer as well, and its installation is far lighter though harder under Linux. Document feeding isnt relevant its just a printer. Please try again later. Please try again later. However, if you do not want to take up too much of your disk space, you can always download it in the future from ManualsBase. The option to print the manual has also been provided, and you can use it by clicking the link above Print the manual. If you want to quickly view the content of pages found on the following pages of the manual, you can use them. Press Setup. Highlight Network and press OK. Highlight Wireless Radio and press OK. Highlight On and press OK. c. Start Wireless Setup Wizard. Highlight Wireless Setup Wizard and press OK. d. Connect to wireless network. The setup wizard searches for available networks, and then displays list of detected network names SSIDs. Highlight your network name and press To create a network profile NOTE The product comes configured with a network profile with hpsetup as

the network name SSID. However, for security and privacy HP recommends you create a new network profile on your computer as described here. 1. In the Control Panel, doubleclick Network Connections. This runs the Wireless Setup Wizard. The setup wizard searches for available networks, and then displays a list of detected network names SSIDs. The infrastructure networks appear first in the list, followed by available ad hoc networks.

The networks with the strongest signal appear first, the weakest appear last. 4. On the display. Otherwise, the HP Photosmart software installer might try to use one of the reserved drive letters and you will not be able to access that network drive on your computer. NOTE 2 Installation time can range from 20 to 45 minutes depending on your operating system, the amount of data. NOTE It is required that the Bluetooth Radio is turned on to enable the Bluetooth options in the Bluetooth Menu. 3. Press the down arrow button until Device Address is highlighted, and then press OK. The Device Address appears, which is read only. 4. Make a note of the device address. You might need it later. To install and print using the Microsoft stack 1. Make sure that you have installed the product software. If you answered No, please continue answering questions. 2. Do you have a private branch exchange PBX phone system? From the first column in the following table, choose the combination of equipment and services applicable to your home or office setting. Then look up the appropriate setup case in the second or third column based on your phone system. Each reset type is applicable to certain types of issues. This type of reset fixes printer issues such as an unresponsive printer. Wireless issues, cartridge mismatch and errors and more. I would recommend starting from this type of reset first then if it does not work, try proceeding to a higher type of reset. To do this all you have to do is Unplug the power cord from the back of the printer. However it removes all the settings on your printer and you need to reenter all your settings like printer language, wireless setting, etc. This is only applicable when all troubleshooting steps have been exhausted. How do you fix it. Service station absorber sponge soaks up used ink during cartridge cleaning. Works as sled filters. ADF assembly includes the complete ADF assembly motor, gears, rollers, sensor, does not include the ADF pad or plastic flatbed cover.

Ask us a question we're happy to help. We are currently answering questions in 8 minutes Ask a question Questions asked between 9am and 5pm, Monday to Friday excluding bank holidays will be answered within 30 minutes. First name Last name Email Brief title of your question example colour ink cartridges Enter the details of your question here Publish this question to help other shoppers Ask Question I've currently run out of all ink, would my Photosmart Premium Fax C309a printer still work if I just order the wider black ink cartridge so that I can just print documentation I really can't afford to buy them all at the moment! Black ink for Photosmart C309a The HP Photosmart Premium Fax All-in-One C309a is a colour printer so it's likely to need all five of the separate black, photo black, cyan, magenta and yellow cartridges HP 364 or HP 364XL installed with some remaining ink in each cartridge in order to be able to print in any colour. If it's possible to override this setting to print in black only then this should be documented in your user guide. This can be downloaded from the following page on HP's website Answered by Natalie Eaton Staff Member about 1 year ago I've purchased the black 364XL ink cartridge and it seems to be too wide for my printer. Please advise HP Photosmart C309A HP364XL black won't fit The HP Photosmart C309a printer uses two types of black cartridge, a regular black and a photo black. Please ensure that you're installing your HP 364XL black cartridge into the correct slot. To help you, the regular black 364XL cartridge is the wider one and has a pentagon symbol on the cartridge. The photo black 364XL cartridge is thinner and has a bow tie symbol on the cartridge. If you're still having problems please contact a member of our telephone support team. Answered by Daniel Kelman Staff Member about 8 years ago Do you want delivery costs included in the price, free next day delivery and great prices.

Some online retailers can offer one of these, fewer can manage two, but Cartridge Save achieves all three. Buy some HP C309a printer cartridges now from Cartridge Save. HP C309a Ink Delivered The Following Day When you choose to place an order for bargain HP printer cartridges provided by Cartridge Save, you can relax in the confidence in the fact that the purchase ought to get delivered the following business day. All HP C309a ink cartridges at Cartridge Save are always covered by a cashback pledge. Still, it is one of the most comprehensive solutions for small office settings that demand a lot of functionality from a single printer. It is surprisingly lighter than other multifunction printers at 10.4 kilograms and rather compact, with dimensions of 28.3x46.8x47.3cm. The LCD screen measures 2.4 inches and is found beside the control panel; it can be pivoted for convenience. The Photosmart Premium Fax C309a lets you print directly from your SD card, a PictBridge-compatible device, xD, CompactFlash, and MemoryStick. It also features multiple connectivity options like Bluetooth, WiFi, Ethernet, and a USB Port. There are separate feeding trays for photo paper and standard A4 paper. Pictures print quickly 26 seconds for 4x6 pictures, and about a minute and 9 seconds when printing on A4 paper. The Photosmart Premium Fax C309a is quite expensive, too.
